

# SQL Server Integration Services (SSIS) for a Liquor Distributor

## Introduction

The Client is a leading wine, spirits, and beer distributor, providing world-class service to customers across the U.S. They have been in business for more than 66 years, representing industry-leading suppliers as well as the best local brands

## Need

The client wants SQL Server Integration Services (SSIS) for populating data, having the intent to leverage some of the work done towards joining multiple data sources. So that, they can have a single view of data for business insights and analytics for the business stakeholders by improving data quality by working across multiple sources of data coming through multiple channels.

## Solution

Contata deeply goes through the problem and creates depth understanding of data flow and provides an SSIS solution that has one common view of all data and information. This makes it easy for the client to keep track of new orders and stocks.

The whole solution consists of the: –

- SSIS package
- Advanced analytics
- Infrastructure design
- Development of ETL packages
- SQL development
- Data load processes

We provided the solution package to the customer using which, an excel file was generated that can be used by the customer to track new orders and changes in stock, bringing more flexibility.

## Advantage

- Real-time excel data to track new orders and changes in inventory
- Better transparency and accuracy
- Reduces the overall cost of operation
- In-depth business insights that bring transparency to the process
